In the pleasant April rain, And the summer sun and dew. So in hour of deepest gloom, So in nour of deepest gloom,
When the springs of gladness fail,
And the roses in their bloom
Drop like maidens was and pale,
We shall find some hope that lies
Like a silent gem apart,

Hidden far from careless eyes In the garden of the heart,

Some sweet hope to gladness wed,
That will spring afresh and new,
When grief's winter shall have fied,
diving place to rain and dewSome sweet hope that breathes of spring, Through the weary, weary time, Budding forth its blossoming, In the spirit's glorious clime.

"But who has pluck enough to do it?" Black." said Lou Wilson. "Who, indeed, but your humble ser-

"But, Cobweb, how will you manage

this time." 'Well, I do," said Cobweb; "so keep If she does, I will let you know all still a moment and I will unfold my about it. But we shall never forget how she looked when she dropped on her for we well knew there was something rich on hand, when Cobweb put on that

face and manner.
"Well, girls," said Cobweb with smile, "you know there is to be a Leap Year Ball next Monday night, at the town hall, and I shall ask 'Old Black,' as we girls call him."

"Oh," said Lou, "you will never dare! he would annihilate you with one of his looks," "Oh, sho! don't you believe yourself. I rather think Cobweb is up to that sort

of thing." "Well, Cobweb," said I, "get the programme all arranged, so that we can rear all the fuu." "Oh, yes, yes," said she, "that is all-

right." Well, we got everything arranged before we went home that night, and could hardly wait to see how it would work. First, let me describe "Old Black." In the first place, he is not old, but a fineooking man of about thirty-five years : but his still, dignified manners, and the fact of his being unmarried, gave him the title of "Old Black," his real name being Mr. Levi Black, and the owner of ne of the finest farms in the town of

H——, where he lives alone with an old housekeeper. The next day Cobweb sent him an invitation to the ball, which was promptly accepted; and Cobweb was in high glee. The wished for night at length arrived, and we were all on tip-toe, you may well believe. Cobweb went early; she drove up to the door about half past seven and, running up the steps, rang the bell. The eld housekeeper came to the door, and looked as though sire thought Cobweb was crazy when she asked for Mr. Black, but she managed to ask her to walk in, and she

would tell her master she wanted to see im. "But what under the sun that chit of a thing wants of Mr. Black, I don't see,"

she muttered, as she went out.

Cobweb sat down and waited with all with the next morning and show him met him reeling home with a consideration. patience. Soon she came back, saying he would be ready presently. Colweb waited an hour, and he did not come; then another hour and no Mr. Black. She was about to ring for some one to find out what the trouble was, when in he

came, all smiles, saying:
"Have I been long? I have been hurried so, I am all nerved up." "Oh, no," said Cobweb, "you have been just no time at all. Well, we will go now, if you are all ready; but it seems hardly possible—you have been so

very quick !" 'Oh yes; I am quite ready." "Well, now we will go."

"We denounce all forms of repudia-tion as a national crime."—Chicago (Rad-ical) Platform.

How about the payment of the interest on our State debt in greenbacks when the bond called for specie? That was Rudical action. Was it or not one of the "forms" of repudiation?

THE Radical leaders have advised Grant to leave Washington, and he is going out to the Rocky Mountains. This is done with a view to get him out of the reach of pestering politicians, who, it is feared, will get him to talk about something eise than horses and Marshai Brown's pups.

THE Oregon election shows how Grant and imperchment "take" on the Pacific coast. Grant was urgent in favor of the impeachment of the President, and the Oregon Senators voted for it. They have been tried by their constituents and coudemned. That verdict is as directly against Grant as against them; it repu-

FORNEY'S Philadelphia Press contemptuously speaks of General McClellan as the author of "all quiet along the Potomac," but it fails to add that this quiet was not the lasting rest resulting from the loss of 117,000 men out of 220,000 in Grant's disastrous march from the Rap-Idan to the James.

FLORIDA is to come into the Union with a Governor from Wisconsin, a Congressman from Pennsylvania, United States Senators from the Eastern and Western States, and a local Legislature anade up of negroes and carpet-bag men, selected "from all the world and the rest of mankind."

THE State Guard reiterates the assertion that the money "is in bank with which to buy a Republican election of United States Senator" in Pennsylvania next winter. "If half that the Republicans have told us about the venality of their own members of the Legislature be grue, the only safe course for the people is to elect Democrats who cannot be purchased, and thus redeem the fame of this good old Commonwealth.

THE Radical party is evidently getting alarmed at the prospect of losing their difference over the soldiers. Several re-cent occurrences indicate that the soldiers PATRONIZE THE BEST! have become fully aware of the monstrous frauds practiced upon them dusing the war and since, and wherever they have been permitted to handle the ballot it has been on the side of conservutism. This fact is doubtless the secret of the recent movement in Congress to arm the negroes in the South, and thus dispense with the "white trash" as our country's defenders

"LET us have peace," say Grant's fuglemen, aping their leader.

Who hinders you? You have Congress by more than two-thirds in sither branck. The President is not in your way, for you can and do override all his wetoes. The Supreme Court is not in your way, for you can and do abridge its jurisdiction. The army is not in your way, for you have created Grant military dictator in the Southern desert which you have made in ten States and call peace. These powers you have and have had for three years, thus utterly unimpeded have you begin on every hand. If you wanted peace why didn't you give us peace?—World.

THE Democratic party despises intelligence, has a soverign contempt for experience and fact, and a superstitious regard for wooden-headed idols; and the journalist who ignores these attributes of the party and its faith litterly goes forth to destruction,—New York Times.

The perpetrator of this bit of infamy, says the Pittsburg Post, cannot plead ig-norance and mitigation of damages. He knows who was the author of the Dectaration of Independence, who made the Louisiana purchase, who instituted the measures which gave us California, New Mexico, &c., who have been the most high minded and patriotic statesmen of America, who inculcated obedience to the Constitution which would have prevented the civil war, the disunion, the slaughter, the desolation, the gigantic debt, the exhausting taxation, and the placing of this nation in the hands of ruffians, malefactors and fanatics to misgovern and plunder the people and de-stroy their liberties. Notwithstanding this knowledge, that the country owe every thing which has contributed to its every thing which has contributed to its greatness to the Democratic party, and that all its minfortunes have come from the appointment of that party, ex-Congressman taymond, of the Times, stuffities himself, and attempts to deceive his readers by sufficient and with the readers by sufficient to the standard above species.

PRIDAY, JULY 3, 1808. BALT AND LIME FOR WIREAT.

At a recent meeting of the Farmers Club of the American Institute, in New York, Mr. George Steele, of Thorndale Chester county, Pa., stated that he has used sait with lime, and alone, as a manure for wheat, for a number of years, with good effect. He thinks that one and a half sacks of merchantable ground sait, or an equivalent of dirty sait, and 25 bushess of lime per acre, dressing of stable manure, and the grass after the wheat is as good. The sait and lime have been applied after plowing, and harrowed in; the lime apread with a shovel or lime spreader, as soon as slaked, while in a nowdered condition. and the salt rown broadcast, or mixed with lime before spreading, or the lime laked with brine. The rocks on Mr. Strele's farm are shale slate. The soil, gravel, clay, and loam, exhausted about 74 years ago, and its cultivation abanfrom barrenness by an improved system manure. The land to which the salt was applied had been frequently limed, which fact may be important in considering the effect of the salt applied alone. Mr. B. believes it to be as good for this land as the salt and lime.

#### TOBACCO FOR ANIMALS & PLANTS.

I have found by experience that a strong decoction of tobacco will destroy vermin on either aulmais or plants. I have used it extensively during many years, for destroying ticks on sheep and lambs: have dipped thousands of them in tobacco water, made by boiling coarse, damaged, cheap tobacco, or stems and effectual cure for the scab, which disease is caused by the working of an insect or mite in the skin of the sheep. It is a sovereign remedy for the blue lice on enttle and horses.

Tobacco water will destroy the aphis or plant louse. Gardeners find their green house plants need to be submitted to a delicate using of this wash occasion ally, to place them in a condition to be healthy and vigorous. When applied to fruit trees, of course waste tobacco is used; add one pound of copperas to five gallons of the wash. Plug tobacco con tains copperas in quantities sufficient to kill any animal that has not accustomed itself, by slow degrees, to its use.

Almost every tree or plant is infested and will, if in sufficient numbers, de stroy its vitality. The hop, in sections invested with the hop aphis, is frequently either wholly or partially destroyed; when, by one or two thorough applications of tobacco water, by means of a for the prompt filling of orders. force pump or garden engine, as they commence their work, the whole aphis army might be swept away. When the vine is trained low, upon seven feet stakes and twine, a garden engine is unnecessary, as the wash can be applied as effectually and with less water, with

a common large syringe.

Tobacco smoke will stupely any animal, and used in a sufficient quantity, has a fatal effect upon all which plug tobacco will destroy. Indeed there seems to be but one animal-mamalia-upon which tobacco, in either shape, does not have an immediate futal effect. However, if that animal would otherwise be infested with insects, trichinœous in their nature, in the mouth, tobacco will keep them away. Perhaps that is their case.

If a sheep or calf is covered with rubber or leather spread, or thick blank et, and a smoke of tobacco is made under the covering, in half an hour or less every tick and nit will be destroyed. Current worms may be served in the same manner. This is not only an effeetive remedy against vermin, but of good use for most obnoxious weeds .- Cor.
